

QS4 ... A Compact Partner

Introducing QS4 ... Compact Mobility for Your Lightweight IT Needs

We are thrilled to introduce the QS4, a nimble and agile cabinet tailored to the specific requirements of smaller IT equipment, such as iPads and tablets. Standing at a height of 105cm, the QS4 retains the precision engineering of its predecessors while focusing on lightweight mobility, making it the ideal solution for compact IT setups. Its simplified framework reduces weight without compromising on structural integrity. The QS4 complements our flagship QS2 cabinet, offering a lightweight alternative for those who require swift mobility without compromising on quality.

QS4 (outer dim. H x W x D :125 x120x60 cm)

Security Tailored to Your Needs

Designed to accommodate iPads, tablets, and similar lightweight IT equipment, the QS4 provides secure storage and protection for your devices. Its interior is customized with shelving at your choice and cushioned padding to keep your equipment snug during transport.

The QS4 is a space-efficient solution that fits seamlessly into environments where a full-sized cabinet might be impractical. Customization is at the heart of the QS4's design. We understand that every IT setup is unique, and the QS4 provides you with flexibility in configuring the cabinet to match your specific requirements.
