

The QS5 ... Aiming for Smaller Device

When designing The QS5, we had iPads, tablets, and similar small-scale IT equipment in mind. The QS5 is just about a quarter of a full scale QS1 with a base measuring only 80x60cm. It features multi selection customizable and removable shelving to ensure a snug fit. Your devices will stay protected from the rigors of transportation, whether you're moving them across the office or across town.

QS5 (outer dim. H x W x D :100x80x60 cm)

Uncompromising Security

Just like our larger cabinets, the QS5 prioritizes the protection of your IT assets. Robust construction, shock-absorbing padding, and a secure locking mechanism ensure that your equipment remains shielded from harm during transport. The QS5 is designed for hassle-free mobility. With easy-roll wheels and ergonomic handles, transporting your smaller IT equipment is a breeze. Whether you're an IT professional on the move or just need to relocate iPads within your organization, the QS5 is your trusted companion.

QS5

“The QS5 is a part of our commitment to provide you with a range of transport solutions to match your unique needs, whether large or small.
